

FOAMGLAS® documentation regarding composition and origin of key input material

10/04/2024

1) Product composition

FOAMGLAS® slabs T3+, T4+, S3, F are cellular glass insulation composed of completely sealed glass cells. The insulation is totally inorganic, contains no ozone depleting blowing agents, flame resistant additives or binders. Without VOC or other volatile substances. The composition of the product is provided below.

Ingredient name	CAS n°	%
Glass oxides	65997-17-3	> 99%
Carbon dioxide	124-38-9	< 0.5%
Carbon black	1333-86-4	< 0.5%
Hydrogen sulfide	7783-06-4	< 0.01%

2) Key input material origin

Key input material (Cullet, scrap, sand) are sourced within the manufacturing country.

Input material	Tessenderlo plant (Belgium)	Klasterec plant (Czechia)
Glass cullet	Belgium	Czechia
Scrap	Belgium	Czechia
Silica sand	Belgium	Czechia
